Fredericksburg, aug 16-dts A VERY FINE CULPEPER FARM AT AUCTION.—As executors of John Cooke Green, we shall, on Monday, the 10th day of September, 1860, if fair, if not, the next fair day, sell at public auction, at "Greenwood," the following

tracts of land. 1st. The tract known as "GREEN WOOD," (the late residence of Mr. Green,) containing 900 ACRES. This tract has been for years regarded as one of the finest in this region of country. It lies within one mile of Culpeper Court House, immediately on the Orange and Alexandria Rail road. About ninety-two aeres are in timber, the residue cleared and in a high state of impreve ment, improved by its late owner with a view sole ly to productiveness, and with no expectation of selling it. It is divided into seven fields with never failing water in each, dowing to the South, giving to nearly the whole of the land an Eastern, outhern and Southeastern exposure. It is tho roughly drained by open and secret ditches, the latter laid with stone. The soil is of the gravelly, red-vein of Piedmont, Virginia, finely adapted to the growth of corn, wheat and the various grasses.

The improvements are a large and commodi-ous DWELLING and out-houses of the most substantial character. For fertility of soil, facilities to market, healthiness and beauty of location, advantages of society, of schools, churches &c., there is rarely offered for sale so desirable an estate. It could be conveniently divided into three tracts so as to give an abundant supply of never-failing water to each. Money Matters in New York. The New York correspondent of the National to attend. The money market shows no material change, and borrowers are obliged to pay full rates. A return to the late low prices is not to be expected. and legal rates will soon be considered in all cases as cheap. The movement of the grain crop, upon which so many anticipations of profits are founded, together with the demand for other crops, and other commercial purposes, will enable lenders to name the price of money, instead of seeking cus tomers at rates named by the borrower. This activity and higher rates for money is a good sign, and is by no means to be considered as an evil by commercial men. These who have made their calculations based upon a five per cent. money market must pay for their mistake, and all who have been tempted to overtrade by cheap money must see their profits abated by the change from dullness in money to sharp competition for its use. Stocks have felt the advance in money most sensibly. The market value of stocks, by reason of dearer money, has been reduced three to live per cent.; but their antrinsic value is by the move ment surely enhanced. This demand for money at high rates is to market grain and move passen gers and freight to an extent which will tax all the rolling stock of roads and k-ep-every keel in motion at full rates; a state of affairs which will
